### Top of the Line Cameras

Our cameras work for both indoor and outdoor use, making them extremely universal for any location or climate. Our cameras all come standard with full 1080p HD so your footage will be extremely clear and vibrant.

### Monitor from Your Smart Phone

It is extremely easy to view your cameras even when on the go with our "3rd Eye" app for your iPhone or Android smartphone/tablet. Simply download the app from the app store scan the qr code on your DVR/NVR and begin monitoring all cameras right away!

### Motion Sensor & Signal Loss Notification

Our security systems have a built in motion sensor feature that will show a notification if there is any movement that has been detected making it easy to monitor the footage. There is also a notification to let you know if there is a loss of signal so you can see if someone is trying to tamper with the cameras.

### Connect to your TV or Monitor

With both an HDMI and a VGA port, easily connect your DVR/NVR to a monitor so that you can instantly monitor the video without a computer. With the included mouse, you can navigate the cameras as well as adjust setting directly on the DVR/NVR with the monitor.

### Pre-Installed Hard Drive for Playback

All of our NVR/DVR kits come equipped with a pre-installed hard drive that will automatically back up video footage for a set amount of time. This way, you can rest assured knowing that you will be able to playback past footage directly from the device.

### Indoor & Outdoor Night Vision

All of our cameras come equipped with IR LEDs to be able to give you the best possible surveillance even when there is little no light. Our cameras have a 90 foot range and will switch into night mode automatically when they sense that there is not enough available light.
